

Town of Acton Invitation to Sealed Bid
Comp Air Mako Breathing Air Systems Cascade System

The Town of Acton has a complete Cascade System available by sealed bid. This system includes Compressor, 4 Cascade Bottles, 2 Outlet Fill Station, and hoses. The system was in Operation until 9-2024 for a municipal fire department, with regular service and maintenance. The unit was last used to maintain the Department's fleet of 4500PSI SCBA Bottles and would fill to approximately 4800PSI within the cascade system. The compressor has 745 hours on what appears to be a working meter, with a BALDOR 230V motor. Known issues: Cascade bottles are out of Hydro Date, Bank 2 gauge is inaccurate, and may slowly leak on the fill station. The complete system is being sold where-is as is with no guarantees or warranties from the Town of Acton. It may be viewed by appointment only at 1725 Route 109, Acton, ME.

Sealed bids should be submitted to the Town Administrator as indicated below:

Town of Acton
Sealed Bid – Air System
35 H Road
Acton, Maine 04001

Bids will be opened at the public Select Board meeting Wednesday, October 9, 2024. The winning bidder will have 48 hours to make payment by cash or certified check and unit must be removed no later than Sunday, October 13, 2024.
